

SAHIL SAPRA

Charlotte, NC 28273 | (216) 848-7236 | sahilsapra391@gmail.com | sahilsapra.com | [LinkedIn](#)

TECHNICAL PRODUCT MANAGER & HARNESS DEVELOPER

Accomplished and results-driven professional with hands-on experience leading aviation B2B SaaS and AI-powered platform initiatives across product strategy, quality engineering, enterprise integrations, and scalable software delivery. Proven track record of driving product-market fit, accelerating go-to-market execution, increasing ARR growth, and delivering operational efficiencies through automation, AI-enabled workflows, and cross-functional leadership that champions team mentorship, development, and influence without authority. Skilled in Agile product management, CI/CD modernization, release control via feature flags, QA automation, and meticulous technical writing for the clear documentation of requirements and specifications. Excels in stakeholder management through active listening—understanding the true needs behind requests—and data-driven decision making within high-growth and enterprise environments. Adept at translating business requirements into scalable product solutions via seamless cross-functional communication with engineering, QA, design, and executive leadership to deliver customer-centric innovation and measurable business impact.

TECHNICAL PROFICIENCIES

Cloud & Infrastructure: AWS (ECS, Lambda, IAM, KMS, S3, VPC, API Gateway, CloudWatch, Systems Manager, Secrets Manager), Azure, Google Cloud Platform (GCP), CloudFormation, Docker, Terraform, MySQL, PostgreSQL, Redis, Railway, Vercel

CI/CD & DevOps: Bitbucket, Git, AWS CodePipeline, LaunchDarkly, New Relic, Observability, Release Automation, Feature Flags

Languages & Frameworks: Java, Spring Boot, TypeScript, Python, Angular, React, Next.js, NestJS, Node.js

API Development: REST, Swagger, Postman, GraphQL, Apigee, API Gateway, Microservices, Caching, RxJS Observables

Tools: Cursor, Claude Code, Codex, GitHub Copilot, Amazon Q Developer, Replit, Lovable, Google Stitch, Jira, Confluence, Tableau, Snowflake

AREAS OF EXPERTISE

- | | | |
|-------------------------------------|----------------------------------|-------------------------------------|
| • Product Lifecycle Management | • Technical Program Leadership | • CI/CD & Release Management |
| • Scalable System Architecture | • AI-Enabled Developer Workflows | • Enterprise Platform Modernization |
| • Cloud Infrastructure Optimization | • Agentic System Design | • QA Automation & Reliability |

PROFESSIONAL EXPERIENCE

SpecHawk Inc. (speechawk.ai)

Co-founder & Head of Product

2026

Built an AI-powered, deploy-aware no-code agentic QA platform for SaaS applications, enabling automated staging environment mapping, test case generation, test execution, Jira ticket validation, screenshot evidence, and scheduling for release quality assurance. Architected using a TypeScript monorepo (Turborepo, pnpm) featuring a Next.js/React frontend, a NestJS API backend (PostgreSQL, Prisma), and a scalable Playwright browser automation worker orchestrated via BullMQ and Redis.

- Validated real-world QA workflows with four strategic design partners, translating engineering feedback into technical requirements, product demos, and adoption-ready release automation capabilities.
- Integrated AI-assisted test generation, Jira validation, screenshot evidence, and scheduled execution into a unified workflow to automate release QA, reduce manual validation overhead, and increase deployment confidence for SaaS engineering teams.
- Executed a six-month product roadmap, delivered MVP (V1), and advanced V2/V3 builds featuring Security Hub for dependency risk analysis, GitHub integration, developer CLI, and a credit-based pricing architecture to enable scalable SaaS monetization.
- Raised early pre-seed capital to support MVP development, customer discovery, and product validation.

CAMP Systems International Inc., Charlotte, NC

Technical Business Analyst / Product Manager II (2025 – 2026)

2024 – 2026

Led quality engineering transformation initiatives by scaling automated testing frameworks and improving QA efficiency across cross-functional product delivery pipelines. Accelerated product development cycles using AI-enabled productivity tools to enhance developer throughput and deliver major platform enhancements ahead of schedule.

- Executed enterprise customer migration strategy, onboarded 75 customers from competing FBO platforms to TFBO Next-Gen, and sustained 104% YoY ARR growth over two consecutive years.
- Conducted comparative analysis of legacy and next-generation systems, while delivering structured gap assessments that exposed key functional and performance inefficiencies and supported informed product roadmap prioritization.

- Directed a feature parity program for TFBO Next-Gen by translating workflow gaps into prioritized requirements, acceptance criteria, and migration sequencing, enabling 75 enterprise aviation customers to transition with zero operational downtime.
- Engineered API-based microservices architecture, streamlined inter-service communication, and reduced system latency to enhance scalability, responsiveness, and overall platform efficiency.
- Led the transition from a legacy monolithic aviation platform to a domain-driven microservices architecture using Java, Spring Boot, TypeScript, and Angular, implementing reusable RESTful APIs, caching, RxJS observables, and lazy loading to reduce data retrieval latency by 68% and eliminate enterprise system timeouts.
- Optimized engineering delivery velocity through AI-driven workflow integration to accelerate the redesign and release of the Invoicing module by five months and reduce customer churn significantly.
- Directed QA resource planning and automation strategy execution that improved test coverage from 62% to 81%, enterprise-grade release stability, and regression quality assurance.

Business Analyst / Product Manager (2024 – 2025)

Supported post-merger integration of multiple FBO operations products into CAMP System’s aircraft maintenance solutions suite following a \$200M acquisition.

- Led enterprise-wide adoption of LaunchDarkly, a release control platform, modernized CI/CD pipelines, decoupled deployment from release cycles, and increased feature release frequency by 400%.
- Developed and deployed a LaunchDarkly API-based JavaScript web application using Cursor, enabled centralized feature flag monitoring and control, reduced subscription costs, and achieved a 7% reduction in team OPEX.

World Kinect, Miami, FL

2022 – 2024

IT Business Analyst (2023 – 2024)

Enabled data-driven product improvements through continuous enhancement cycles to optimize ERP workflows and align with aviation industry operational requirements.

- Supported enterprise aviation ERP product operations by collaborating with cross-functional engineering, QA, and stakeholders to enhance system reliability, scalability, and user experience across FBO360 deployments.
- Spearheaded integration initiatives connecting four major accounting platforms and two loyalty/rewards programs into FBO360 to expand product ecosystem capabilities and enable new customer acquisition and market penetration.

Business Intelligence Intern (2022)

Assisted in business intelligence and analytics initiatives by developing interactive dashboards, performing data modeling, and generating actionable insights to inform product and business decisions.

- Engineered seven Tableau dashboards leveraging Snowflake SQL data across four customer-facing applications to enable advanced product analytics, uncover usage patterns, and reduce customer attrition by 28%.

ADDITIONAL EXPERIENCE

Summer Intern, Keiretsu Forum, San Francisco, CA

- Built Python-based classification models to evaluate ~250 early-stage startups, automating due diligence and surfacing 8 high-potential seed investment targets for the in-house venture fund.

EDUCATION

Master of Science in Computer Systems – AI Specialization

Relevant Coursework: Machine Learning, Generative AI, Model Development, Prompt Engineering, Cloud Computing
Indiana Wesleyan University, Marion, IN (2026 – Present)

Bachelor of Science in Quantitative Economics, Co-Major in Analytics, Minor in Computer Science | Honors: Dean’s List (2020, 2022)

Relevant Coursework: Large Language Models, Sentiment Analysis, Big Data, Agile/Scrum, Strategic Communication
Miami University, Oxford, OH (2019 – 2023)
